CRUISE 2

The New Generation of CRUISE Series

A new generation of CRUISE equipment has been introduced by Seuic, based on its star product "CRUISE1P" - CRUSIE2, which has many advantages in terms of performance, reliability, and operation experience compared to the first-generation CRUISE, with good grip and easy operation. In addition, many improvements have been made to offer the front-line employees a better operating experience and increase their efficiency.

Product Features

Strong core and performance

Qualcomm Snapdragon octa-core 2.0 GHz processor, running performance is 100% higher than the first generation of CRUISE so that a variety of applications can be used smoothly

high-speed Wi-Fi transmission

The latest Wi-Fi 6 ready technology, compared to the first generation, has significantly improved connection stability and transmission distance. In addition, despite dense three-dimensional shelving in large warehouses, it is smooth to connect for real-time data transmission.

Additional optional ex-range scanner which can reach 10m reading can enlarge the feasibility in warehouse and outdoor.
